

Dr. Noriko Kawakami is a Senior Fellow in the power electronics systems division at Toshiba Mitsubishi-Electric Industrial Systems Corporation. She has been leading several development projects of large capacity power electronics equipment at the cutting edge of technology.

Noriko Kawakami received her B.S. degree in physics from Sophia University in 1982. In the same year, she joined Toshiba Corporation and has been engaged in development and designing large-capacity power electronics equipment for more than 30 years.

She received the IEEJ (the Institute Electrical Engineers of Japan) Technical Development Award in 2000 and the IEEJ Transactions Prize

Paper Award in 2010. In 2003, she moved to Toshiba Mitsubishi-Electric Industrial Systems Corporation, which is a successful joint venture of two major Japanese companies in the industrial field. She earned her Ph.D. in Electrical Engineering from the Tokyo Institute of Technology based on her work on control systems for large-capacity self-commutated converters. Since June 2018, she is serving as the President of the IEEJ Industry Applications Society. She is also serving as an AdCom Member-at-Large of Power Electronics Society of IEEE, since 2018.

Dr. Kawakami was elevated to the grade of IEEE Fellow in 2018.
